

CLAIM OR CLAIMS:

Claim:

What I claim as my invention is the arrangement of a series of numbers in a two dimensional sequential format of columns and rows called the Grizzle Number Line used for the distinct purpose of finding Prime numbers as defined in Mathematics. (Figure 1A)

Claim:

What I claim as my invention is a wave form called the Kieu Wave Form which is a series of numbers that when applied to the Grizzle Number Line are arranged in such fashion as to cause a distinct pattern in multiples of six beginning with the numbers 5 and 7 respectively. (Figure 2A)

Claim:

What I claim as my invention is that when the Grizzle Number Line is created in a series of multiples of six rows and that each row is thirty columns long that this series forms a 'grid'.

Claim:

What I claim as my invention is the use of a two dimensional number line (Grizzle Number Line) and an associated (Number Line) and associated wave form (Kieu Wave Form) and a 'grid' layout along with the combined Symmetry of these particular parts that this constructs a Process for finding Prime numbers and that this "Process" is a unique part of my invention.
